Self Description

Driven to explore new technology paradigms and learn from team players. Python, C, C++ are favorite languages that I work with for out of school projects like a Black Jack simulator built on the pygame library. Linux is a passion and Manjaro is the operating system of choice on all my computers. Currently working with Vultr cloud services with Ubuntu LEMP server. Future plans are to continue work on black jack Python app and explore REST api with cloud server.

Education

Texas State University	Bachelors of Computer Science	Graduated - December 2019 CS Major GPA – 3.0

Experience

G&H Sales   Summer 2014
